Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, in section b, c, d, e and f, the phrases "the modules may" is not further limiting. No positive recitation has been set forth.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Unrein [US 2002/0001175].

Regarding claim 1, Unrein discloses a computer system comprising a plurality of distinct backplane modules (figure 3), wherein a first backplane module (301) comprises a plurality of high speed point to point connectors (307) to receive power from at least one power supply backplane module (paragraph 36) to distribute the power to the

backplane module other than first module and power backplane modules (paragraph 34).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Unrein in view of Draughn et al. [US 6,349,037].

Regarding claim 2, Unrein discloses everything claimed except the specific use of an active switch fabric card being used with the backplane.

Draughn et al. disclose an electrical backplane (A) using an active switch fabric card (E1).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the switch fabric card with the backplane of Unrein, as suggested by Draughn et al., for the purpose of providing cross point switching.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Unrein, as modified, as applied to claim 2 above, and further in view of Cannella, Jr. et al. [US 6,144,561].

Art Unit: 2841

Regarding claim 3, Unrein, as modified, disclose everything claimed except the high speed point-to-point data connections using optical links and/or connectors.

Cannella, Jr. et al. disclose a backplane (figure 2) having an optical links connection card (18, column 5, line 66 column 6, line 17).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the optical link type connector with the backplane of Unrein, as modified, as suggested by Cannella, Jr. et al., in order to facilitate optical connections to the backplane.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Petit et al. [US 4,703,394] disclose a system for interconnecting orthogonally disposed printed circuit boards and switching networks employing same; and
- Duffy et al. [US 2002/0199203] disclose a switched digital video gateway.
